DETAILED ACTION

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by JP A10190354 for reason of record.

Regarding newly amended recitation “the inverter including two transistors connected in series, a source of one of the two transistors being grounded”, such structure is CMOS inverter. Supporting document Watanabe US 20030048143 showing a CMOS inverter, the symbol and its structure.

Response to Arguments

Applicant's arguments filed 7/11/06 have been fully considered but they are not persuasive.

Regarding applicant comments directed to the rejection of claims 1-7. Applicant argues that Takahashi does not disclose or suggest an inverter that includes two transistors connected in series, a source of the two transistors being grounded. This argument is not persuasive because such structure is a CMOS inverter and the symbol in Takahashi is implying a CMOS inverter.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
